May 09th 2020, 7:00-10:00 PM, Baku (GMT +4)

Agenda:

Session01 - Covid19 Impact on tech ecosystem

Speaker: Garib M

Host: Vurgun H

Questions:

1. Sako - Are you ready?
2. What do you think about hiring interns while pandemia continue? Just for 3 month?
3. Would you keep remote work even after Pandemie ends? or anything that convinced/discovered/lessons learned that would be better to keep in order to run the business?
4. If some Mid or Senior offer to work with you for free for long time, will you accept that offer? Who know ;)

Session02 - Getting started with Meshery

Speaker: Lee Calcote

Host: Sako M

To join Layer5 community channel:

https://join.slack.com/t/layer5io/shared_invite/zt-6b3n8jyt-ceyiQsGGNsdbnbsTlcG~EMg

Questions:

1. Sako - Are you ready?
2. Does Meshery assume multi-mesh deployments in infrastructures and provide its value in bridging them? If I have only single mesh, i.e linkerd deployed, what value would Meshery bring? Performance testing is one off value, what are the ongoing values it might bring if any?
3. You have experience with many service mesh solutions, which one do you think is a better solution for multi-cluster K8s infrastructure. Network is not flat.
4. How big company may use Meshery?
5. Whats the next thing after meshes, i mean can meshing services cause some new problems (if yes, what)
6. I can ask this in a GH issue or other channels as well so feel free to ignore: how is the performance benchmark setup? Do you install a sort of Pingmesh?
